[illegible][illegible]

1. **Identify the problem:** The first step is to identify the problem or issue that needs to be addressed. This involves understanding the current situation, gathering relevant information, and defining the scope of the problem.

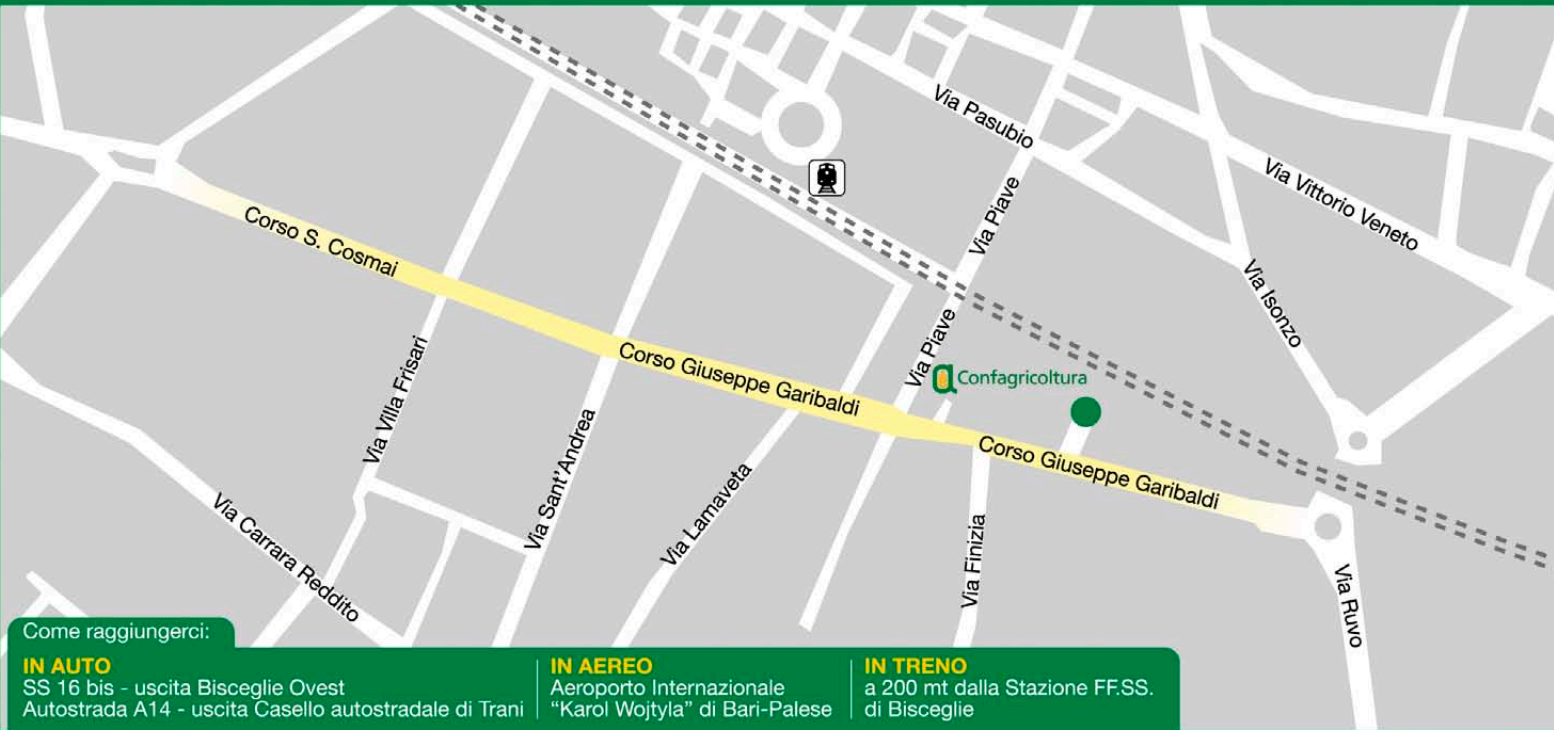

2. **Analyze the problem:** Once the problem is identified, the next step is to analyze it. This involves breaking down the problem into smaller, more manageable components and identifying the underlying causes.

3. **Generate solutions:** The third step is to generate potential solutions. This involves brainstorming ideas, consulting with others, and exploring different approaches to solve the problem.

4. **Evaluate solutions:** The fourth step is to evaluate the generated solutions. This involves comparing the solutions against the problem, assessing their feasibility, and determining the most effective and efficient solution.

5. **Implement the solution:** The final step is to implement the chosen solution. This involves developing a plan, allocating resources, and executing the solution while monitoring progress and making adjustments as needed.
